Education

Western Governors University

Austin, Texas

BACHELOR OF SCIENCE - SOFTWARE DEVELOPMENT

Graduated Nov. 2022

- Comprehensive program focused on software engineering, programming, and web development, with an emphasis on real-world applications and industry standards. Coursework included data structures, algorithms, software design, and development, as well as proficiency in C#.

Skills

Tech .NET, C#, ASP.NET, React, Node.js, Python, SQL, Azure DevOps, Snyk

Domains Developing and Supporting Applications, Database Administration, Production Support

Experience

Convey Health Solutions

Ft. Lauderdale, FL (Remote)

SOFTWARE ENGINEER

Dec. 2022 - Present

- Led the development and maintenance of Online Monitoring Tool (OMT), a multi-tenant web application with a React front end and IIS back-end, enabling healthcare companies to track compliance tasks aligned with HPMS regulations..
- Enhanced functionality and performance of Miramar: Agent, a modular web application supporting agent onboarding, training, compliance oversight, and commission management for government-managed care organizations.
- Contributed to the development of Commissions, a cloud-based, microservices-driven application with a C# .NET backend and Angular front end, streamlining insurance agent commission processing.
- Applied agile methodologies to deliver high-quality software aligned with business goals and industry compliance standards.

Insight One Solutions

Fort Worth, TX (Remote)

.NET DEVELOPER

Nov. 2021 - Aug. 2022

- Developed new features for web applications utilizing MSSQL databases, ASP.NET MVC and C#.
- Assisted with production support; fixing bugs submitted to help desk.
- Assisted development of Azure DevOps CD/CI development pipelines, and improved Application Development Team's Agile practices.

Fay Servicing

Farmers Branch, TX

SOFTWARE ENGINEER

Oct. 2018 - Nov. 2021

- Developed and maintained applications using a variety of technologies that support multiple lines of Business and IT initiatives in an Agile development environment.
- Developed new features for web applications utilizing MSSQL databases, AngularJS, and C#. Used React and Typescript to migrate/upgrade applications to Azure.
- Prepared accurate and detailed requirement specification documents, user guides and functional specification documents.
- Provided guidance on coding, re-factoring, root cause analysis and feature design best practices to juniors.
- Worked as a technical lead for development efforts and mentored other team members.

RifleGear

Plano, TX

SYSTEMS SOFTWARE ENGINEER

Feb. 2015 - Oct. 2018

- Implemented and maintained in-house software for business operations including on-boarding new employees, software to meet requirements for accounting of firearms acquisition and disposition, manage inventory etc.
- Developed CMS software in C# to schedule customer facing website content updates.
- Functioned as Help Desk Support Lead. Responsible for organizing and prioritizing support requests.
- Responsible for system and network administrative responsibilities.

Horizon Technology

Lake Forest, CA

JR. SOFTWARE DEVELOPER

Aug. 2012 - Jan. 2015

- Maintained multiple SQL Server (MS SQL Server 2008 R2) databases including automating backup, as well as development and implementation of various optimized stored procedures and jobs that run in conjunction with software to deliver data to the OPS and Accounting teams.
- Responsible for communicating with Ops team to develop new features for an in-house logistics and supply chain software application, as well as an accounting system MS Dynamics GP 2010. This involves discussions on a deep level involving business terms and logic, reports on adoption rates, and thoroughly vetted documentation and training plans.
- Responsible for management of support for Studio 5, a sister company, who delivered custom interactive touch-screen kiosk experiences for Horizon Display customers. This included troubleshooting of our custom-built Window 8.1 touch software.
- Developed a C# application used to generate and print all serial number labels for warehouse shipments. This application included various validations to prevent human error and ensure every label printed was free of defects.
- Responsible for assisting the help desk team when software issues are escalated as necessary.
